

NAV 2022

Wednesday, June 15, 2022 - Friday, June 17, 2022

Scientific Program

Conceptual and practical ship design

Offshore vessels design & engineering

Naval ships design & technology

Yacht and pleasure craft design

Inland waters vessels

Stability, Seakeeping, Maneuverability

Numerical hydrodynamics

Experimental hydrodynamics

Structural design

Material & production technology

Ship propulsion, machinery and systems

Environment protection and ship energy efficiency

Electric systems

Comfort on board

Safety and security

Marine renewable energy

Underwater technology and marine robotics

Unmanned vehicles

Ship digitalization

Cyber security
